## SCIENTIFIC PROGRAM

A concentrated, multidisciplinary effort has yielded much insight into the function of TNF and its homologues. The 5th International Congress on TNF and Related Cytokines will highlight advances in the biology of the TNF family, its receptors, and other components of this important cytokine system. The clinical application of TNF and TNF inhibitors will also receive detailed coverage. In December of 1993, a final announcement and call for abstracts will be distributed. Abstracts will be accepted until the last possible date, in order to assure that the most current information is presented at the meeting.

## ASILOMAR CONFERENCE CENTER

At the tip of the Monterey Peninsula, overlooking the Pacific Ocean, Asilomar occupies one of the most beautiful coastal spots in the world. It offers an atmosphere that is uniquely conducive to scientific discussion, and is ideal for larger groups, meeting together or as subcommittees. The natural setting of Asilomar includes forest, dunes, and a mile of pristine beaches. A wide range of recreational facilities is also available.

Asilomar is accessible via the Monterey Peninsula Airport, with frequent connecting flights to and from San Francisco or San Jose International Airports.

## RESERVATIONS

Meeting attendance will be limited to a total of 675 participants. Requests for reservations will be processed in the order received. Address inquiries to:
